  GNU Make Kurzreferenz
  (sorry, only available in German)

GNU Make Targets

Some important GNU Make targets:

- `make all`

  builds the package

- `make install`

  installs the package

- `make clean`

  deletes object files and the executable

- `make dist`

  generates a distribution package

- `make distclean`

  delete all stuff configure has created

- `make distcheck`

  checks the package for distribution

- `make maintainer-clean`

  deletes all object files, the executable and all distribution files that can be regenerated by

Autotools
