MX Linux 23.4 AHS on Dell XPS 13 (9360)

My additional installation steps were:[1)]

1. updated the BIOS to v2.21 (fixes some ACPI issues);
2. add boot parameter `pci=noaer` to get rid of *AER* (Advanced Error Reporting) errors in kernel ring buffer (dmesg);
3. Fix Me!: because the touchpad was working only sporadic (lost i2c arbitration in kernel module `i2c_designware`) i did execute the procedure described in Stijn Tintel's blog (only do once!);
4. restore config files from backup:
   - `~/.gpg`,
   - `~/.ssh`,
   - `~/.config/vivaldi/Default`, together with `.local/share/keyrings` (else all saved passwords will be lost)
   - `~/.config/Nextcloud`,
   - `~/.config/xfce4/panel`,
   - `~/.config/gtk-3.0/bookmarks`,
   - etc ...

1)
Based on *Debian* 12.7 most things work out-of-the-box (inclusive my ext. monitor via *DisplayLink*).
